

# ● Calling Mothers with Bipolar Disorder and their Children

We would like to invite mothers with bipolar disorder and their children to participate in a study that aims to identify early warning signs of adolescent depression.

We are looking for:

- Mothers with bipolar disorder and their elementary school aged children
- Children and parents must be English speaking with no hearing or vision problems

We will study children's cognitive function, mental health and daily activity levels as possible predictors of mood disorders. A saliva sample for gene analysis will also be taken.

If you want to know more about our study, please contact:  
Holly at 604-827-3074 or by email at [bipolar@devcogneuro.com](mailto:bipolar@devcogneuro.com)

Contacting us in no way obligates you to participate in our study. We look forward to hearing from you!
